Rizky Noufal Hidayat

Software Engineer | Backend Developer | AI Engineer

rizkynaupal87@gmail.com | 081295967609 | Kabupaten Bogor

SUMMARY

Final-year Computer Science student at Universitas Pakuan with a GPA of 3.65 and hands-on experience in software development through internships at Bank Rakyat Indonesia (BRI) and PT Indocement Tunggal Prakarsa Tbk. Experienced in backend development using Golang, REST APIs, and PostgreSQL, as well as web application development and AI-based solutions using Python. Strong foundation in problem-solving, debugging, and data processing, with the ability to adapt to new technologies and collaborate effectively in cross-functional teams.

WORK EXPERIENCE

Production Helper Feb 2021 – Apr 2021

PT Kurnia Manunggal Sejahtera.

- Responsible for packaging rail grab components and CVT covers in accordance with company quality standards.
- Ensured accurate product quantities and secure packaging before distribution.
- Maintained a high level of focus and attention to detail to achieve daily production department targets.

Software Engineer Agu 2025 – Okt 2025

PT Indocement Tunggal Prakarsa Tbk.

- Developed an end-to-end POSM web application using Laravel (PHP) and MySQL to automate data management and track the distribution of company promotional materials.
- Designed responsive user interfaces using JavaScript, HTML, and CSS, ensuring clear visualization of promotional material inventory status for operational teams.
- Optimized MySQL queries and database structures to improve the efficiency of transaction data retrieval and distribution reporting.
- Prepared AI/Computer Vision data pipelines by managing and annotating hundreds of visual data samples using Roboflow to support object detection model training.
- Improved application stability through end-to-end testing, debugging, and close collaboration with cross-functional teams in continuous system improvement cycles.

Backend Developer Jul 2026 – Okt 2026

Bank Rakyat Indonesia Persero Tbk.

- Developed backend services for a Human Capital application using Golang, REST APIs, and PostgreSQL.
- Built efficient APIs for Dashboard, Talent Management, Master Data, and Role-Based Access Control (RBAC) features.
- Enhanced application security by implementing JWT authentication, account lockout mechanisms, and user provisioning.
- Optimized database queries and refactored code to improve API response times and maintainability.
- Collaborated throughout the Software Development Life Cycle (SDLC) using Git, Docker, and Insomnia, while maintaining code quality and security standards through SonarQube and Checkmarx.

EDUCATION

Universitas Pakuan Jun 2022 – Sekarang

S-1 Ilmu Komputer – IPK 3.65/4.00

SKILL

Teknis: Golang, Python, PHP, JavaScript, SQL, Flask, Laravel, React.js, REST API, PostgreSQL, MySQL, Roboflow, Git, GitHub, Docker, Insomnia, DBeaver, SonarQube, Checkmarx, Google Colab, Figma.

Bahasa: Indonesia Active, Inggris Passive
